

Gateway to Success – Values of Sports

Dion Chen, Principle, YMCA of Hong Kong Christian College (YHKCC)

YHKCC is a big family who strive to enable all students to become confident, happy and responsible “global” citizens.

We put emphasis on “whole-person” development and the provision of all-round educational opportunities for students in both academic studies and extracurricular activities.

With 45 clubs on offer students can discover, unleash and develop their talents and interests outside the academic curriculum. Our football, rugby, cheerleading and basketball teams are especially popular and continue to achieve outstanding results in various competitions. The rugby girls A and B-grade teams were Champions and the boys A-grade team was the Plate Champion in the HKSSF Rugby Sevens Competition.

Every student is encouraged to join at least one interest group and one sports group to strike a balance between study and sports. Inter-class, inter-house and inter-school activities are regularly organised to engage and arouse students’ interests. Each year, a Sports Prize Presentation Ceremony is held to recognize the commitment and determination of students.

Participation in sport is fundamental to the maturity of students and the skills learnt contribute to their holistic development. Sport participation teaches the important key values of honesty, teamwork and leadership, fair play, respect (for themselves and others), and adherence to rules. It also improves learning by encouraging school attendance and a desire to succeed.

All of these valuable qualities are reflected in the school’s 5 Core Values: serve one another in love, respect others and ourselves, act with integrity, be responsible and build a community that cares.

YHKCC is dedicated to supporting a health lifestyle both inside and outside and looks forward to a continued relationship with DB Pirates.
